Summary

For the past decade I have focused on software quality for all sorts of systems and platforms. Presently I am working as a Professional QA Lead in one of the top most technology company known for its dominance in the mobile phone market. In my position I manage the end-to-end process from test planning, risk analyzing, requirements analyzing, test case creating. I am ISTQB certified professional and very strong in backend API testing, Database validation, Performance Testing and UI Testing-Web/Mobile applications. On technical side I can deal with Python, Selenium, Appium, Playwright and JMeter. I also create and maintain vital test data, environments and automation scripts. dedicated to providing high-quality, reliable software solutions.

Highlights

- **15 years in QA**, growing from Junior QA Engineer to Sr. Chief Engineer at **Samsung Research Bangladesh.**
- Led and mentored QA teams, improving efficiency and driving best practices.
- Built and implemented test automation frameworks using Selenium, Robot Framework, and API testing tools.
- Integrated automated testing into CI/CD pipelines, speeding up releases and reducing manual effort.
- Strong background in MySQL database testing, API testing with POSTMAN and Performence testing with JMeter.
- ISTQB Certified, currently advancing towards Test Manager certifications.

Education

- **Bachelor's in Computer Science & Engineering** (CSE)
  Sonargaon University, Dhaka. **CGPA**: 3.84
- **Diploma in Computer Engineering** (CSE)
  Cumilla Polytechnic Institute, Cumilla. **CGPA**: 3.30
- **Secondary Scholl Certificate** (SSC)
  Yusuf M.T High School, Cumilla. **CGPA**: 4.38

Certifications

ISTQB Certified Tester – Foundation Level (CTFL)
ISTQB Advanced Level – Test Manager (In Progress)

Experience

Samsung R&D Institute Bangladesh, Dhaka
Total Tenure: 15 Years [July 2011 – June 2026]

- Sr. Chief Engineer [2025-2026]
- Chief Engineer [2021 - 2025]
- Technical Lead [2019 – 2021]
- Lead Engineer [2017 – 2019]
- Senior Engineer [2015 - 2017
- Software Engineer [2013 – 2015]
- Junior Engineer [2011 - 2013]

Key Responsibilities & Expertise

- Manual, functional, regression and end-to-end testing.
- Designing detailed test plans and executing them.
- Test automation using Selenium WebDriver, Playwright, and Appium
- API testing using Postman and validated different https requests(get, post, put, delete)
- Mobile testing (mobile web as well as native mobile apps)
- Collaborated teams across different locations and ensuring smooth delivery.
- Working closely with internal and external stakeholders to meet project goals.
- Creating project documentation, matrices, automation scripts, Resource allocation & management.
- Supporting Senior project Managers with coordination activities and reporting.
- Using MS Excel extensively (pivot tables, charts, Gantt charts, reports)
- Working in both SDLC and Agile (Scrum) environments.
- Strong written and verbal communication skills.
- Test case management, writing & Execution (JIRA, TestRail), CI/CD integration with creating Jenkins jobs, version control (Git, github), defect lifecycle management, QA reporting and metrics.
- I am ISTQB certified, and currently advancing towards Test Manager certifications.

Technical Skills

Testing Tools: Selenium, Playwright, Robot Framework, Postman-Newman, JMeter
Automation Frameworks: PyTest, Robot Framework, Seleniumbase
Programming Languages: Python, C, JavaScript (Functional)
Databases: MySQL
Test Management: Jira, TestRail, PLM (Samsung)
Version Control: Git, GitHub
CI/CD: Jenkins
